Canadian Pacific Hotels

IN THE ROCKIES

Banff Springs Hotel, Banff, Alberta

A magnificent hotel in the heart of Rocky Mountains National Park, backed by three splendid mountain ranges. Alpine climbing, motoring and drives on good roads, bathing, hot sulphur springs, golf, tennis, fishing, boating and riding. Open May 15th to September 30th. European plan. 1½ miles from station. Altitude 4,625 feet.

Chateau Lake Louise, Lake Louise, Alberta

A wonderful hotel facing an exquisite Alpine Lake in Rocky Mountains National Park. Alpine climbing with Swiss guides, pony trips or walks to Lakes in the Clouds, Saddleback, etc., drives or motoring to Moraine Lake, boating, fishing. Open June 1st to September 30th. European plan. 3½ miles from station by motor railway. Altitude 5,670 feet.

Emerald Lake Chalet, near Field, B. C.

A charming Chalet hotel situated at the foot of Mount Burgess, amidst the picturesque Alpine scenery of the Yoho National Park. Roads and trails to the Burgess Pass, Yoho Valley, etc. Boating and fishing. Open June 15th to September 15th. American plan. Seven miles from station. Altitude 4,262 feet.

Glacier House, Glacier, B. C.

In the heart of the Selkirks. Splendid Alpine climbing and glacier exploring, driving, riding and hiking. Open June 15th to September 15th. American plan. 1½ miles from station. Altitude 4,086 feet.

Hotel Sicamous, Sicamous, B. C.

Junction for the orchard districts of the Okanagan Valley, and stop-over point for those who wish to see the Thompson and Fraser canyons by daylight. Lake Shuswap district offers good boating, and excellent trout fishing and hunting in season. Open all year. American plan. At station. Altitude 1,146 feet.

ON THE PACIFIC COAST

Hotel Vancouver, Vancouver, B. C.

The largest hotel on the North Pacific Coast, overlooking the Strait of Georgia, and serving equally the business man and the tourist. Situated in the heart of the shopping district of Vancouver. Golf, motoring, fishing, hunting, bathing, steamer excursions. Open all year. European plan. One-half mile from station.

Empress Hotel, Victoria, B. C.

A luxurious hotel in this Garden City of the Pacific Coast. An equable climate has made Victoria a favorite summer and winter resort. Motoring, yachting, sea and stream fishing, shooting and all-year golf. Open all year. European plan. Facing wharf.

THE PRAIRIES

Hotel Palliser, Calgary, Alberta

A handsome hotel of metropolitan standard, in this prosperous city of southern Alberta. Suited equally to the business man and the tourist en route to or from the Canadian Pacific Rockies. Good golfing and motoring. Open all year. European plan. At station.

Royal Alexandra Hotel, Winnipeg, Manitoba

A popular hotel in the largest city of western Canada, appealing to those who wish to break their transcontinental journey. The center of Winnipeg's social life. Good golfing and motoring. Open all year. European plan. At station.

EASTERN CANADA

Place Viger Hotel, Montreal, Quebec

A charming hotel in Canada's largest city. Open all year.

Chateau Frontenac, Quebec, Quebec

A metropolitan hotel in the most historic city of North America. Open all year.

McAdam Hotel, McAdam, N. B.

A commercial and sportsman's hotel. Open all year.

The Algonquin, St. Andrews, N. B.

The social centre of Canada's most fashionable seashore summer resort. Open June 30th to September 8th.

PACIFIC COAST TOURS

THE Pacific is the greatest and the last of oceans—the greatest in extent, the last to be discovered by the European, the last to be made a theatre for maritime history. Of all the lands bordering its far-flung coast, British Columbia is in some respects the most promising to the settler, as well as the most picturesquely varied to the tourist.

Emerald
Lake

PACIFIC COAST TOURS *through the* CANADIAN PACIFIC ROCKIES

It was in 1745, when the French regime was drawing towards a close in Quebec, that Michael Novitskof sailed eastward in his moss-calked, skin-sewn shallop in pursuit of sea otter till he touched the antenna of a continent, in the Island of Attu. Other Russian fur traders followed. The whole slender, volcanic Aleutian chain gradually became known to them—flat, mist-drenched islands, given over in the main to seals and sea birds. But though Russia touched Alaska, she turned back across the Pacific.

Meantime France was reconnoitring from the east. La Verendrye crept across the vast prairies, sighted the foothills, saw, perhaps, the looming peaks beyond. Later, in 1751, de Niverville followed, made his way up the muddy waters of the Saskatchewan, built Fort Lajonquière and would doubtless have ventured into the wonderland of the Rockies but that tidings out of the east called him to help Montcalm against the invading British. Thus France, too, came to the gateway of the Land of Promise and passed by on the other side. In 1774 the Indians of British Columbia sighted their first vessel, a great-winged bird of happy omen, they thought, bearing its Spanish captain, Juan Perez, in search of new land in which to plant a cross and raise gold. In 1769 the colonization of California began, but was not pressed northward, halcyon shores to the south being more attractive to the good friars who loved gardens as well as souls. Thus Spain came to British Columbia, traded in furs at its doorway and sailed away again.

Fate had reserved the conquest of tremendous peaks, the settling of warm, secluded, sun-drenched fruit valleys, for the only race fitted to join them up to the rest of the world by rail—the Anglo-Saxon.

In 1792 Captain Vancouver sailed from England in the "Discovery," rounded the Horn and left his name as a gift for a great island and a greater city on the Canadian Coast. A year later Alexander Mackenzie, seasoned by terrific hardships endured in descending his mighty godchild, the Mackenzie River, in its rush to the Arctic, pushed through the Rockies by the Peace River Pass and stood beside the Pacific. He was a partner in the

North West Company, great rival of the Hudson's Bay Company, and northern British Columbia soon became a kingdom ruled by a monarch, the Scottish Chief Factor. Simon Fraser was another Nor'wester, who ran the rapids of the river which bears his name and reached the Pacific in 1806.

What with the rivalries of the Hudson's Bay, the Nor'-westers and the subsequently formed Pacific Fur Company, to say nothing of tribal warfare among the Indians, the Coast in the early nineteenth century became a spectacular spot. In '58 an additional element of lawless picturesqueness was stirred in by the advent of 30,000 goldseekers, who rushed north from San Francisco bound for the rumor-land around the Fraser and Thompson rivers. Just here the British Government stepped in and made the future province into a colony as the one means of anchoring it to its native mountains.

In 1871 the Canadian Pacific was begun; eleven different surveys across the mountains were patiently worked out, only that ten of them might be ruthlessly cast aside. It was not till November 7, 1885, that the last spike was driven linking the Pacific Coast of Canada with the Atlantic.

Today the tourist may join the annual pilgrimage of happy pleasure-seekers who visit Banff, may stand on some conquered peak from which the endless mountain prospect radiates four hundred miles to the Pacific, a thousand to the Arctic, a thousand and more southward.

He may travel to matchless Lake Louise, where Nature has composed her mountains, her glaciers, her forests, into a picture as endlessly changing in light effect as it is forever fixed and satisfying in wonder of line and balance of color-mass.

Seated in a comfortable observation chair or open car, he may glide down the Kicking Horse Canyon, where, in 1883, Sir Sandford Fleming recorded that he and his guides and his cayuses were "from five to eight hundred feet high on a path of from ten to fifteen inches wide and at some points almost obliterated, with slopes above and below us so steep that a stone would roll into the torrent in the abyss below."

Leaving the Rockies, the tourist may slide through the Columbia Valley and up into the mighty Selkirks. He may dip south to the pastoral charms of the enchanting Lake Windermere district or into the orchards of the Okanagan country; he may reach Vancouver city and take passage across the Pacific. Or he may take a Canadian Pacific steamer up the coast to marvellous Alaska, where volcano and glacier are set beside each other and the fiord country rivals Norway, where the salmon cannery beats the gold mine and the fur seal grows fat and lusty in the protected Pribilofs.

Finally he may come back again across the width of a mighty continent by different ways of equal comfort, without once leaving the lines of what is the world's greatest highway, the Canadian Pacific Railway.

INTRODUCTION TO THE ROCKIES

FROM the roof garden of the Palliser Hotel at Calgary, one can see the glistening peaks of the Canadian Pacific Rockies sixty miles away. Their call is irresistible—like a magnet they pull the trains of eager travellers. For 500 miles the Canadian Pacific Railway follows the wild canyons that the rivers have dug, brawling, glacier-fed, about the feet of the giant peaks.

CANADA'S NATIONAL PARKS

THE main line of the Canadian Pacific traverses or adjoins four of the magnificent national parks of Canada—Rocky Mountains Park, the chief centres of which are Banff and Lake Louise, Yoho Park, centring at Field, Glacier Park, one of the finest mountain-climbing regions of North America, and Mount Revelstoke Park. These national parks have every kind of inducement to offer the nature-lover.

BANFF

BANFF is the capital of Rocky Mountains Park, which has nearly 700 miles of trail radiating in all directions. Here the Canadian Pacific Railway has placed the most beautifully situated and luxuriously comfortable mountain hotel in the world, overlooking the junction of the Bow and the Spray rivers. Within easy reach are gentle climbs and gorgeous panoramas, the picturesque and brilliantly colored terraces of the Hot Springs; together with stiff and challenging ascents like that of Mount Edith for the graduated Alpinist, who very often makes his headquarters with the Alpine Club of Canada, on the slopes of Sulphur Mountain.

Buffalo, mountain sheep, mountain goat, and other animals at Banff are a never-failing source of interest.

Excellent golf links have been laid out at Banff and there are beautiful river trips.

DRIVES AND PONY TRIPS AT BANFF

There are numerous interesting spots in the vicinity, all easily accessible by good carriage roads and bridle paths. A short distance from Banff Springs Hotel are the Bow Falls, a cataract of wonderful beauty; Tunnel Mountain, from which a splendid view of the valley is obtained, and the Cave and Basin, a remarkable formation from

which gush natural sulphur springs. Within a radius of three miles are the Hoodoos, natural concrete pillars of various shapes and sizes, Cascade Mountain, Stoney Squaw Mountain, the beautiful Vermillion Lakes, the animal paddocks and Sun Dance Canyon, a deep and curious cleft in the mountain. At a distance of nine miles is Lake Minnewanka, a pretty sheet of water, sixteen miles long, extremely deep and walled in by tremendous cliffs, and the home of huge fighting trout. A wonderful river trip up the Bow can be made by electric launch.

An interesting automobile run of about fourteen miles brings you to Johnston Canyon, where an excellent trail leads to a great waterfall. The new Banff-Windermere automobile road over the Vermillion Pass has now made accessible the exquisitely beautiful Marble Canyon. This road, which was completed only last summer, has opened up a magnificent Alpine country hitherto known only to the trapper and the hunter through eighty miles of pass and canyon. At Lake Windermere there is a rustic bungalow camp with accommodation for fifty people. During the year 1923, two new camps and one rest house will be erected on this automobile road. Lake Windermere can also be reached by rail from Golden.

LOVELY LAKE LOUISE

LAKE LOUISE bears the liquid music, the soft color notes of its name, into the realm of the visible. Behind its turquoise mirror rise the stark immensities of Mounts Lefroy and Victoria, the latter "the big snow mountain above the Lake of Little Fishes" of which the wandering Stonies used to tell. Here, on the margin of this most perfect lake, the Canadian Pacific has placed its Chateau in one of those wonderful Alpine flower gardens in which the Rockies abound. Yellow violets and columbines, white anemones and green orchids, make merry with the red-flowered sheep laurel and the white-tufted Labrador tea. Be he never so lazy, the tourist has something to reward him in this gay garden backed with the rich-toned lake and the milky green of the glacier.

Lake Agnes, "the Goats' Looking Glass," as the Indians used to call it, is a wild tarn shut in by sombre cliffs, a thousand feet above Lake Louise. Here the great white anemone blooms by the late snowdrift and there is the silence of eternity among the high hills. It is reached from the hotel by an easy trail which also takes in the lovely Mirror Lake. The trail continues to the Big Beehive, or to the lookout on the Little Beehive, commanding a magnificent panorama of lake, glacier and mountain.

It is a three-mile trip to Saddleback Mountain, which affords an admirable view of the lovely Paradise Valley. At a distance of about ten miles is Moraine Lake, situated at the head of the valley of the Ten Peaks and reached over a good carriage road recently constructed. On the

shore of the lake in the midst of scenes of surpassing beauty, is Moraine Lake Camp. Consolation Lake, about three miles further by trail, provides good trout fishing. The Victoria Glacier, a great palisade of hanging snow, Abbot Pass, a deep canyon between Mounts Victoria and Lefroy, O'Hara Lake, set amid scenes of wild Alpine grandeur, Cataract Creek, Paradise Valley and the Ptarmigan Lakes are among the notable spots well worthy of a visit. The new Upper Glacier Trail to Victoria Glacier is of exceptional interest and beauty.

THE GREAT DIVIDE

SIX miles west of Lake Louise is the Great Divide, at once the highest elevation of the Canadian Pacific, the boundary between Alberta and British Columbia, and the very backbone of the continent. Marked by a rustic arch, a stream of water divides, by one of those freaks by which Nature diverts herself, into two little brooks that have vastly different fates. The waters that flow to the east eventually reach the Atlantic Ocean; the rivulet that runs west adds its mite to the volume of the Pacific.

THE SPIRAL TUNNELS

From the Great Divide the railway begins to descend. Between here and Field, a distance of fourteen miles, it descends in fact nearly a quarter of a mile. Formerly this was a most difficult track, the gradient being 4.5 per cent; but by two wonderful tunnels, which form one of the most notable engineering feats in the world, this difficulty has been eliminated and the grade reduced to 2.2 per cent. These are the famous "Spiral Tunnels" under Cathedral Mountain and Mount Ogden. The line turns two complete circles, roughly a figure 8 in shape, passing under itself twice and emerging over one hundred feet lower than it entered.

WAPTA CAMP

WAPTA CAMP, a rustic bungalow camp, has been located on a picturesque site two miles west of the Great Divide for the convenience of those wishing to visit the Yoho Valley and Lake O'Hara. It has accommodation for fifty people, at moderate rates. The station for the camp is Hector.

At beautiful Lake O'Hara, to the South, is a smaller camp, which will this year be enlarged to accommodate twenty-four people. It is reached by an excellent trail from Lake Wapta.

THE YOHO VALLEY

THE beautiful Yoho Valley can be reached by several routes—either by road from Wapta Camp, by carriage road from Field (a lovely drive or ride of eleven miles in each direction), by trail from Emerald Lake over Yoho Pass, or by trail from Field over Burgess Pass.

Takakkaw Falls are formed by a single thread of water dropping 1,200 feet into a still and mighty-treed valley. Opposite the falls Yoho Valley Camp, which this year will be enlarged to accommodate twenty-four people, provides a convenient centre for excursions either to the upper valley or to Emerald Lake. For those who make the journey over the Yoho Pass, a rest house is provided at Summit Lake.

The Upper Yoho Valley can be visited by a trail which continues past Laughing Falls and the great Wapta Glacier, to the curious Twin Falls, whose divided waters unite in one stream before reaching the depths below. A rest house is being built at Twin Falls.

EMERALD LAKE

EMERALD LAKE, as green as its name, is a seven-mile carriage drive from Field, at the end of which accommodation may be obtained at the cosy Emerald Lake Chalet, which, with an extension that was made last year, has accommodation for over seventy people. An attractive two-day riding trip can be made from Emerald Lake Chalet, spending a night at Yoho Valley Camp, and continuing next day up the Kicking Horse Pass to Wapta Camp.

Other pleasant excursions may be made to points of interest within a short distance of Field, such as the Fossil Beds, the Aerial Silver Mines, Natural Bridge, and the Monarch Mine Cabins.

WINDERMERE VALLEY

AT GOLDEN one reaches the Columbia River, which here flows north until it turns at the Big Bend for its southward flow to the Pacific Ocean. Golden is the junction for a new branch line of the Canadian Pacific Railway, which runs between the Rockies and the Selkirk Mountains and passes through highly picturesque scenery past Lake Windermere to the Crownsnest line of the Canadian Pacific Railway. The creeks which open up the great Selkirk Range to the south of this valley provide access to some of the most spectacular Alpine scenery in North America, while the hunting and fishing in season are also good.

At Lake Windermere, south of Golden, a bungalow summer camp is situated on the shores of one of the loveliest warm-water lakes in British Columbia, with every facility for bathing, boating, riding and motoring in a country of exceptional beauty.

GLACIER

UNTIL the end of the year 1916 the railway climbed over the top of Rogers Pass through a gorge, subject in winter to heavy snowslides against which the track was protected by four

miles of snowsheds. These are now evaded by the double-track Connaught Tunnel, the longest tunnel in North America, which pierces its way through Mount Macdonald and reappears in the Illecillewaet Valley below Mount Sir Donald and the Illecillewaet and Asulkan glaciers. From portal to portal this tunnel measures five miles, but so straight is the line that the exits are never out of sight.

About a mile from the western exit is Glacier House, built by the Canadian Pacific Railway for the convenience of Alpine climbers and others who wish to explore the trails and visit the lakes, glaciers and caves of this wonderful Alpine region. Almost at the back door of the hotel is the great Illecillewaet Glacier. Swiss guides and sure-footed ponies are located at the hotel for the benefit of those who wish to climb the glaciers and mountains or ride the trails to heights commanding magnificent panoramas.

PONY TRIPS AND MOUNTAIN CLIMBING

Leading from the hotel a good trail follows the turbulent course of the Illecillewaet River to the Illecillewaet Glacier; other trails branch off in all directions, inviting and leading the mountain climber, explorer and lover of Nature to scenes of marvellous grandeur and enchanting beauty. Glacier Crest, Lake Marion and Observation Point are among the shorter and easier ascents. Mount Abbott is a day's climb, but not a difficult one. From its summit an exceptionally fine view is obtained of the Asulkan Valley. Easy trails also lead up to the summits of Eagle Peak and Mount Avalanche. The ascent of Mount Sir Donald is more difficult, but with the assistance of experienced guides may readily be accomplished.

An excellent trail leads to the Asulkan Glacier, through scenes of Alpine splendour, and the recently discovered Caves of Nakimu are only distant about seven miles from Glacier House by a carriage road and bridle path. These wonderful caverns, said to be larger than the Mammoth Caves of Kentucky, have been formed by the action of water for ages upon the solid rocks, and form a series of chambers with large entrances, polished rock ceilings and walls which sparkle with quartz crystals and reflect myriads of miniature lights from the darkness.

An Alpine Hut at Glacier Circle, and a rest house at Nakimu Caves, will be established this year.

SWISS GUIDES

THE Company's own Swiss guides are stationed at Lake Louise and Glacier, and may be engaged through the managers of the Canadian Pacific Railway hotels.

From Glacier, the route descending the western slope of the Selkirks follows the valley of the Illecillewaet through Albert Canyon, a marvellous gorge of great depth and startling fascination. Revelstoke is an important centre, from which there is water communication with the rich Kootenay and Boundary districts. A motor road is under construction to the top of Mount Revelstoke, which has been converted into a national park and is attracting increasing numbers of summer visitors.

SICAMOUS

AT SICAMOUS an excellent hotel is operated by the Canadian Pacific Railway, and is especially convenient either for those who wish to stop off somewhere and make the all-daylight trip through the Canadian Pacific Rockies, or for those who are visiting the fertile fruit-growing Okanagan Valley for which this is the junction.

THE CANYONS

KAMLOOPS, the junction of the North and South Thompson rivers, is the beginning of the magnificent canyon country through which we shall travel virtually all the way to Vancouver. The canyons are second only to the Rockies in spectacular scenery, and the traveller is well repaid if he will stay overnight at Sicamous so that he can travel them in daylight. The mountains draw together as the train winds along ledges cut on their face; tunnels penetrate the headlands, lofty bridges span the ravines, and below rushes the river.

At Lytton the canyon widens to admit the Fraser, the largest river of British Columbia, which comes down from the north between two great lines of mountain peaks, and whose turbid flood soon absorbs the bright green waters of the Thompson. The scenery grows wilder than ever. The great river is forced between vertical walls of black rock, where, repeatedly thrown back upon itself by opposing cliffs, it madly foams and roars. North Bend makes a desirable stopping place for those who wish to see more of the Fraser. Ten miles below is the famous "Hell's Gate," where two jutting promontories suddenly compress the river and force it to escape in a roaring cataract through a bottle-necked outlet. The railway follows the canyon at often a considerable height above the river bank; the track, hewn from solid rock, not only crosses from side to side in the canyon, but also tunnels through great rock spans. Presently the canyon widens out, and we reach a meadow like country through which we roll to Vancouver.

ALTERNATIVE ROUTE VIA THE KOOTENAY

DIVERGING from the main line of the Canadian Pacific at Medicine Hat, an attractive alternative route, between Medicine Hat and Revelstoke, is offered via the Crowsnest Pass Route, affording a most delightful steamer trip on the Kootenay Lake from Kootenay Landing to Nelson, continuing by rail to West Robson, from which point another steamer trip may be enjoyed through the beautiful Arrow Lakes to Arrowhead, joining the main line at Revelstoke for continuance of trip to Vancouver.

A new route passing through scenery of exceptional

beauty takes the traveller from Nelson, via Grand Forks and Penticton and the orchard districts of the Okanagan Valley, over the Kettle Valley Railway, rejoining the main line at Hope. Grand Forks is the gateway to the Boundary mining district, and the centre of a fertile apple country. The Coquihalla Valley from Summit to Hope provides wonderful fishing.

SPOKANE

BEFORE reaching Kootenay Lake, an alternative can be followed by taking a branch line to Kingsgate, whence the Spokane International Railroad can be traversed into Spokane. Through cars are run to Spokane.

Spokane, capital of "the Inland Empire," is an important financial and commercial city, with huge smelters, mines, waterfalls, power plants, and an exceedingly prosperous agricultural territory within its sphere. From it also can be easily reached some very delightful scenery.

From Spokane connections can be made in all directions.

VANCOUVER

THE terminal of the Canadian Pacific's trans-continental rail lines and its trans-Pacific steamship routes, is the largest commercial centre in British Columbia, and has an excellent harbor nearly landlocked and fully sheltered. It faces a beautiful range of mountains. Two peaks, silhouetted against the sky, remarkably resembling two couchant lions, are visible from almost any point in the city or on the harbor, which has appropriately been termed "The Lion's Gate."

In and around Vancouver are immense lumber and shingle mills. Mining, lumbering, farming, shipping, and shipbuilding form the bulwark of the city's phenomenal growth and prosperity.

All kinds of water sports are possible at Vancouver, and are encouraged through a mild climate and extensive bodies of water. There are many bathing beaches, parks, boulevards, automobile roads and paved streets. Stanley Park, one of the largest natural parks in the world, is excellently maintained by the city.

The Hotel Vancouver, operated by the Canadian Pacific, is second to none on the Pacific Coast, is conveniently located and has a high reputation for the excellence of its service. Wonderful views can be had from the roof of this great hotel. Vancouver has four admirable golf courses which are open to visitors.

It is only a short run by Canadian Pacific Railway steamer to Nanaimo, where the Esquimalt & Nanaimo Railway connects with the beauty spots of Vancouver Island.

From Vancouver Canadian Pacific Empress steamships cross the Pacific to Japan, China, and the Philippines. The two new vessels, "Empress of Canada" and "Empress of Australia" (22000 gross tons each), are the largest, newest, finest and fastest steamships on the Pacific Ocean. The Canadian Australasian line runs regularly from Vancouver to Honolulu, Suva, (Fiji), New Zealand and Australia.

PRINCESS STEAMERS BETWEEN VANCOUVER, VICTORIA AND SEATTLE

THE short but interesting trip on Puget Sound should not be omitted from the itinerary. If requested when purchasing, it will be included in through tickets without additional charge. (See route No. 1, on map.)

The Company's Princess steamers, operating on this route, are the fastest and best equipped in the Pacific coastwise trade.

VICTORIA

CHARMINGLY situated on Vancouver Island, overlooking the straits of Juan de Fuca, Victoria drinks in the sunshine and smiles at the traveller. It is distinctly a home city, with fine roads and beautiful gardens, although its enterprising business district, composed of imposing stores and tall office buildings, speaks of a rich commerce drawn from a territory full of forest, mineral and agricultural resources. Victoria's beauty lies in her residential districts, her boulevards, her parks and her public buildings. The Parliament Buildings of British Columbia rank among the handsomest in America.

The Empress Hotel, another of the chain of Canadian Pacific institutions, gives the guest attention and service equalled only by the best in the land. It overlooks the inner harbor and is within a stone's throw of the Parliament Buildings. Golf facilities on four fine courses can be arranged for visitors to the hotel.

From Victoria delightful excursions may be made into the interior of Vancouver Island, either by automobile or by the Esquimalt & Nanaimo Railway. The Malahat Drive is a luxuriously smooth and picturesque motor road. Excellent hotels are to be found at Shawnigan Lake and Qualicum Beach and a delightful little chalet inn at Cameron Lake. Mount Arrowsmith proves one of the best climbs and Qualicum Beach has a good sporting golf course. There is no better fishing on the Pacific Coast than that which one finds on the Campbell River, reached by motor from Courtenay, the northern terminus of the Esquimalt & Nanaimo Railway. The immense Douglas fir forests on this beautiful island and the balmy climate make it wonderfully attractive to the tourist.

RAIL ROUTE TO SEATTLE

AT VANCOUVER, B. C., the Canadian Pacific Railway connects with the Great Northern Railway for Bellingham, Burlington, Everett and Seattle.

This is an alternative route to Seattle and points south, but tickets reading by rail will not be good via steamship, or vice versa, between Vancouver and Seattle. (Route No. 2, all rail.)

ALASKA

FROM Vancouver the palatial yacht-like "Princess" steamers of the Canadian Pacific will carry the traveller to Alaska. This exceedingly popular side-trip can be made in nine days, although any one with more time to spare will be well repaid if he spends longer than this, and penetrates farther into the wonderful "Land of the Midnight Sun."

The trip is a thousand-mile one through the famous "Inside Passage," winding between the long fringe of islands and the mainland as through a fairyland. It introduces one to magnificent scenery of a character unknown elsewhere in North America—long fiord-like channels, looming glacier-clad mountains that dip deeply into them, gaily painted totem poles, Indians, gold mines, and always the purple glories of the Alaska sunset.

Running out from Vancouver, the first stop is Alert Bay, a little fishing town with some deeply picturesque totem poles. The next day Prince Rupert is reached, and a few hours later Ketchikan, the first Alaskan port and a very flourishing community. Then comes Wrangell, and beyond the Taku Glacier—a famous glacier that extends back over 90 miles. Then, turning up the Gastineau Channel, the ship reaches Juneau, capital of Alaska.

During the several hours that are allowed on shore leave here, a visit can be made to the highly interesting museum, or by automobile to the Mendenhall Glacier. Juneau has a large gold ore-crushing plant, a big trade in furs and fish, and first class hotels and restaurants.

And then, eight hours north, up the beautiful Lynn canal, is our terminus, Skagway—Skagway the celebrated camp of the Klondyke rush of '98, then the wildest and wickedest town in the world, but now a model of propriety. In summer it is a riot of color with its gay gardens. It, too, has good hotels, and there are plenty of diversions to occupy the 36-hour lay-over of the steamer—such as the excursion to West Taku Arm.

THE YUKON

THOSE who wish to go farther can travel by rail from Skagway—the White Pass & Yukon Route, which takes one almost literally over the roof of the world. It is a run of about 8 hours by this line over the steep White Pass to Whitehorse, in the Yukon Territory, passing en route the beautiful Lake Bennett. From Whitehorse, a little frontier town on a tributary of the

mighty Yukon river, the same company's steamer can be taken still farther north to Dawson, centre of the Klondyke gold mining region. This is a trip occupying, from Whitehorse and back, about seven days.

A shorter side-trip which can be taken independently or in combination with the Whitehorse trip, is to Lake Atlin. Taking the W. P. & Y. train, a change is made at Carcross to a steamer which carries one eastward to this lovely lake, which in magnificence of scenery vies with any in the world. At the village of Atlin, the W. P. & Y. Company has established a commodious and comfortable tourist hotel, which every summer houses an increasing number of visitors.

SEATTLE

SPLENDIDLY located on Puget Sound, mountain-girt and fringed with lakes, Seattle is the largest city in the State of Washington, and one of the most important on the Pacific Coast. It is a beautiful and progressive community situated on the slopes of the hills that front the Sound, and has a fine harbor accessible to the largest vessels afloat.

Lake Washington, a body of fresh water about twenty miles long and three miles wide, bounds the city on the east, and is now connected with the Sound by the Lake Washington Canal, a very notable feat of engineering with a great and important bearing upon Seattle's future. The down-town business section of Seattle has many large buildings, including one of forty-two stories—the highest in America outside of New York.

Seattle has a very pleasant residential section, especially in the vicinity of the University of Washington, and many beautiful parks, beaches, and summer resorts. A large number of enjoyable trips can be made from Seattle by train, steamer and motor, such as to Bellingham, Everett, Tacoma, and Mount Rainier. Hundreds of miles of good roads radiate from the city.

TACOMA

TACOMA, the southernmost of the quartette of North Pacific cities that cluster along the Gulf of Georgia and Puget Sound, stands on a bluff at the head of deep water navigation on the Sound, and is connected with Seattle by excellent motor roads, as well as by train.

It is known as the "Lumber Capital" of America on account of the quantity of lumber manufactured and shipped from here. Vast furniture factories make it the Grand Rapids of the West.

PACIFIC COAST TOURS *through the* CANADIAN PACIFIC ROCKIES

RAINIER NATIONAL PARK

RAINIER NATIONAL PARK is easily accessible from either Seattle or Tacoma. For the hiker, there is the enjoyment of attempting the ascent to Columbia Crest, the summit, or in climbing the other peaks in the park that require less preliminary training and can be made without guides. The tourist can also view the wonderful scenery of the park from the saddle, as one of the most interesting trips is a 3½-hour horseback jaunt along Skyline Trail.

But it is not necessary even to hike or ride to feast on the beauty of Mount Rainier, as the vacationist can view the majestic scenery from the veranda of Paradise Inn, located in beautiful Paradise Valley. One can have luncheon at sea level at Seattle or Tacoma, and after a delightful automobile ride dine at the Inn.

The Wonderland Trail, 145 miles long, encircles the mountain. In the twelve days' trip the traveller meets with endlessly changing panoramas of mountain and glacier, canyon and forest, lakes and rivers and wild flowers. Mount Rainier is 14,408 feet high.

PORTLAND

PORTLAND, Oregon, famous for its Annual Rose Festival held in June, is so located as to permit trips of widely diverse nature. The steamer trip up the Columbia River into the Cascade Mountains is one of the most interesting. The Columbia Highway is a magnificent motor road leading along the bluffs overlooking the Columbia. One can go down the river to Astoria and along the ocean shore to Seaside, or up the river to Hood River and the Dalles. Turning south from the Dalles one can follow the California Highway to Crater Lake and Klamath Falls.

The ascent of Mount Hood (11,225 feet) requires only three or four days from Portland for the entire trip.

Mount Adams (12,307) can be visited from Trout Lake village, three hours by automobile from White Salmon, which is across the river from Hood River.

TO CALIFORNIA

PASSENGERS en route to California have the choice of either an overland trip or a sea voyage from North Pacific Coast points. From Portland to San Francisco the picturesque Shasta Route of the Southern Pacific, the Pacific Steamship Company, or the San Francisco & Portland Steamship

Company, may be used; from Victoria or Seattle steamers of the Pacific Steamship Company maintain a regular service to San Francisco and Wilmington (port for Los Angeles).

SAN FRANCISCO

SAN FRANCISCO, a port of all flags on an ocean of world commerce, is one of the most distinctive cities on the American continent.

Possessing one of the largest landlocked harbors in the world, with an area of 450 square miles, San Francisco has an imperial position which is emphasized by the blithe architecture of the myriads of buildings topping her many hills.

The city itself stands upon the promontory of the northern part of San Francisco peninsula, with an outlook in every direction. To the east are the bay, hills and populous cities of Alameda County. To the north are the Golden Gate, the Marin County hills and majestic Tamalpais, mountain of the sea. To the west are the illimitable expanses of the Pacific, and to the south San Francisco Bay again, extending into the vast orchard-filled valley of Santa Clara. San Francisco bay rivals that of Naples, and the Golden Gate leading into it was so named from its resemblance to Constantinople's Golden Horn.

Parks, elaborate and well designed, are thronged with people. The largest, Golden Gate Park, containing 1,013 acres, is a veritable fairyland of loveliness. The cafes, of which there are hundreds, are famed for their Bohemian life and their good cooking.

In the immediate vicinity of San Francisco are enough short pleasure trips to keep a tourist delighted and busy for months. There are Mount Tamalpais, the Muir Woods, the trip down the ocean shore, Mount Hamilton Observatory, the University of California with its famous Greek Theatre, Lake Merritt, and the city of Oakland, with the trolley rides in its vicinity. There are Stanford University, San Jose and the Santa Clara Valley fruit section, the old Mission San Juan Bautista with its relics; Monterey, Del Monte, Pacific Grove, Carmel Bay, Carmel Mission, Moss Beach, Pebble Beach, Santa Cruz and the Redwood Big Tree grove; day excursions to Mare Island Navy Yard and Napa Valley, the petrified Forest, Mount Lassen volcano and many more. The whole bay region is a recreation ground for those that love the out-of-doors.

LAKE TAHOE AND THE YOSEMITE

SAN FRANCISCO, the ultimate objective point of most of those who visit Northern and

Central California, is a convenient centre for many tours radiating through the state. The Yosemite National Park and the Sierra Nevada, for instance, can be reached by rail to Truckee and Lake Tahoe, and then by automobile over the spectacular Tioga Pass nearly 10,000 feet above the level of the sea, or by Merced and El Portal. Lake Tahoe (6,225 feet above the sea) encircled by snow-capped peaks, its deep blue and emerald green waters framed with lordly pines, is one of the most beautiful spots in a state famed for its beauty. A steamer makes a daily 72-mile circuit of its shores during the summer season.

The descent into the Yosemite Valley from the rugged heights of the Tioga Pass gives one the thrill of a lifetime. Yosemite Lodge and Camp Curry provide delightful bungalow camp accommodations for the many thousands who come by rail or automobile to see the marvels of El Capitan, Yosemite Falls, the Half Dome, Glacier Point, Nevada Falls, the Grand Canyon of the Tuolumne, and the Mariposa Big Tree Grove. An admirable automobile service is provided by the Yosemite Transportation System.

SANTA BARBARA

SANTA BARBARA, half way between San Francisco and Los Angeles, famous for its Mission, its hotels, its mountain background, its palm trees, and its outlook on the Pacific, has a peculiar fascination for the visitor from the East. Bathing and fishing are here the accessories to perfect outdoor happiness. "A half-opened lotus flower," this city has been called, "whose fragrance calls its devotees from around the world."

LOS ANGELES

LOS ANGELES gladdens the eye with its twenty-three public parks, containing 3,897 acres of lawns, flowers, hills, trees and lakes. The architecture is varied, and suggests the different parts of the world from which its residents have come. Famous for its beautiful homes, lovely gardens and fine hotels, Los Angeles is one of the most attractive cities in the United States.

The moving picture colonies at Hollywood have brought particular fame to this part of California, but Los Angeles is more than a movie city. It is rapidly becoming one of the great industrial centers of the United States.

MOUNTAIN ALTITUDES

The Canadian Pacific Rockies comprise some of Nature's most gigantic works. In many mountainous regions the chief peaks spring from such high plateaus that, although they are actually a very considerable height above sea level, their height is not very impressive to the traveller. That this is not so in the Canadian Pacific Rockies is evident from the following tables, which show the altitudes of the principal mountains seen by the traveller from the train or at the most popular mountain resorts—altitudes not only in relation to sea level, but also to the valleys at their base.

	Height above sea level, feet	Height above valley, feet— about		Height above sea level, feet	Height above valley, feet— about

For next year— See the World!

CANADIAN PACIFIC ALL THE WAY

The Canadian Pacific is not only the premier railway of America, it also is one of the largest steamship companies in the world, with services from Canada to both Europe and Asia.

In 1924 the Canadian Pacific has pleasure in announcing magnificent steamship cruises.

Around the World

A wonderful journey of about 115 days by the "Empress of Canada"—a fine, luxurious steamship of 22,000 tons (gross register). Cruise leaves New York January 30th, 1924, visiting 18 countries in Europe, Africa, Asia and America—and arrives Vancouver about May 26th, with return from there to destination by rail.

To the Mediterranean

A delightful 70-day cruise by the magnificent steamship "Empress of Scotland," of 25,000 tons (gross register). Leaves New York January 14th, 1924, visiting 14 countries, with return from Europe by any Canadian Pacific steamship.

Either of these cruises will be the trip of a lifetime. For rates, booklets, reservations, and any other information,

Ask any Canadian Pacific Agent

An illustration for a Canadian Pacific Railway advertisement. The top half of the image features a large, rugged mountain peak with patches of snow and a steep, dark blue slope. The sky is a pale yellow. In the center, the words "CANADIAN PACIFIC RAILWAY" are written in a bold, yellow, serif font with a dark outline. The bottom half of the image shows a large, multi-story building with a prominent, steeply pitched roof, situated on a hillside. The building is surrounded by dark evergreen trees and a white fence. The foreground shows a snowy slope with more trees and shadows. The entire illustration is framed by a dark brown border.
